-

2. Development Environment

- ■ Install Python
 - ■ Install Node.js
 - ■ Install MongoDB
 - ■ Install PostgreSQL
 - ■ Install Redis
 - ■ Install FFmpeg
 - ■ Install Docker
 - ■ Install VS Code
-

3. Frontend Setup

- ■ Create React/Vite project
 - ■ Setup routing
 - ■ Create responsive UI
 - ■ Create dashboard
 - ■ Create video preview system
 - ■ Create authentication pages
-

4. Backend Setup

- ■ Setup Flask/FastAPI
 - ■ Create REST APIs
 - ■ Setup environment variables
 - ■ Setup logging
 - ■ Setup error handling
 - ■ Create API modules
-

5. Authentication System

- ■ User registration
 - ■ User login
 - ■ JWT authentication
 - ■ Google OAuth login
 - ■ Password hashing
 - ■ Email verification
-

6. AI Script Generator

- ■ Setup OpenAI API
 - ■ Setup Gemini API
 - ■ Create prompt system
 - ■ Generate scripts
 - ■ Generate captions
-

7. Video Generation System

- ■ Install FFmpeg
 - ■ Setup MoviePy
 - ■ Setup OpenCV
 - ■ Create rendering engine
 - ■ Add transitions and effects
-

8. Voiceover System

- ■ Setup ElevenLabs API

- ■ Configure AI voices
 - ■ Sync audio with video
 - ■ Add multi-language support
-

9. Subtitle System

- ■ Setup Whisper AI
 - ■ Generate subtitles
 - ■ Sync subtitle timing
 - ■ Create animated captions
-

10. Copyright Detection

- ■ Setup audio fingerprinting
 - ■ Setup video similarity detection
 - ■ Create risk scoring system
 - ■ Detect duplicate content
-

11. SEO Generator

- ■ Generate YouTube titles
 - ■ Generate descriptions
 - ■ Generate hashtags
 - ■ Generate Instagram captions
-

12. Publishing System

- ■ Setup YouTube API
 - ■ Setup Instagram API
 - ■ OAuth permissions
 - ■ Video upload automation
-

13. Storage System

- ■ Configure AWS S3

- ■ Setup Cloudflare R2
 - ■ Setup backups
 - ■ Configure CDN
-

14. Security Setup

- ■ HTTPS setup
 - ■ JWT encryption
 - ■ CSRF protection
 - ■ XSS protection
 - ■ Rate limiting
-

15. Payment System

- ■ Stripe integration
 - ■ Razorpay integration
 - ■ Subscription plans
 - ■ Invoice generation
-

16. Analytics System

- ■ Track video history
 - ■ Track downloads
 - ■ Track publishing history
 - ■ Create analytics dashboard
-

17. Testing

- ■ Unit testing
 - ■ API testing
 - ■ Security testing
 - ■ Mobile testing
 - ■ Performance testing
-

18. Deployment

- ■ Deploy frontend
 - ■ Deploy backend
 - ■ Configure Docker
 - ■ Setup Nginx
 - ■ Setup monitoring
-

19. Scaling

- ■ GPU rendering
 - ■ Redis caching
 - ■ Queue systems
 - ■ CDN optimization
-

20. Legal Requirements

- ■ Privacy Policy
 - ■ Terms & Conditions
 - ■ DMCA Policy
 - ■ Cookie Policy
-

Final Product Vision:

A professional AI-powered SaaS platform that automates video generation, copyright detection, SEO optimization, and publishing for YouTube, Instagram, Shorts, Reels, and future social media platforms.
